

# Virtual Infrastructure

# Health Check

## Overview

You've made a significant investment to virtualise your computing environment; let Triangle help ensure that you are getting the most from your investment. Virtualisation touches many aspects of your data center such as servers, networks and storage – as well as the organizations and processes that control them. One of our Certified Professional consultants will work with your team to understand your unique environment and provide guidance on the current leading practices for configuring and managing your VMware systems. Working together with your team, we will review your Infrastructure systems and provide concrete, actionable recommendations for any opportunities for optimisation that are uncovered.

## Deliverables

- Conduct assessment of VMware virtual environment (up to 2 nodes) using VMware Virtual Infrastructure Methodology (VIM) to validate current environment
- Identify potential areas to optimise configuration and improve performance
- Present an interactive workshop to facilitate knowledge transfer on VMware best practices

## Target Audience

The many organizations that have embarked on the virtualisation journey but may be experiencing some difficulties or feel that they have yet to reap the benefits of their investment.

## Roles and Responsibilities

- Triangle Virtualisation consultant (VCP) analyzes the environment and processes, conducts workshop, transfers knowledge of best practices and makes recommendations for optimal performance. Coordinates access to IT processes involving VMware virtual environment
- Customer IT Manager & IT Team Coordinates access to IT processes involving VMware virtual environment.

## Key Activities

| Action   | Responsibility |
|--|----------------|
| Kickoff call/ meeting  | All            |
| Architecture and operations review   | All            |
| Technical audit and analysis   | Consultant     |
| Operations analysis including consideration of business objectives                         | Consultant     |
| On-site wrap up  | Consultant     |
| Create assessment report (includes documentation and Visio diagram of your infrastructure) | Consultant     |
| Review final assessment report   | All            |

## Key Benefits

- Optimise VMware virtual infrastructure performance
- Maximise resources through efficiencies and road map for future improvements
- Mitigate risk by leveraging experienced consultants and proven best practice

## Pricing and Scope

- 2 days on-site and 1 day off site for creating the assessment report
- Maximum of 5 participants
- Contact your Triangle Account Manager for pricing information
- This Service is only offered by VMware Consulting partners (VAC)

## Requirements

- Existing VMware infrastructure environment including VMware ESX Server
- Administrator (root) access to VMware installations
- Conference room with projector and networked desktops/laptops running MS Windows 2000 or higher
